Handled With	Good heifers to handle in the yards the odd one played up a bit in the crush. Nothing unusual there. They had just been drafted off the cows. Typical weaners, overall well handled cattle Bikes , On foot , Vehicles
Assessor Comments	A tidy line of very well bred heifers that have a good start in life and are on the move. These heifers have topped the Braidwood weaner sales in past years. They are in fresh condition and have the conformation to make for front paddock breeders or alternatively grow on grain or grass, they are out of big roomy cows there is a weight variance but this is age not quality related. The tail has been taken out and the odd small one that appears in the video is not in the assessment. NOTE for buyers in Theileria prone areas , these heifers have had generational exposure so would be carrying a degree of natural immunity. There is a lot of steers from this breeder as well in this sale. We can organise local trucks if required. Due to yard constraints the steers and heifers were videoed together, the steers have the orange tags and heifers yellow.
