Notable Traits	Traits 1 Head White halfway to navel		

Assessor Comments	Buyers, on offer is a quality line of 26 Angus steer calves, 9–10 months of age. These weaned steers represent the lead draft and were weighed out in a tight weight range from 230-290kgs at assessment. Steers were easy to handle and display good frame, presenting in predominantly store condition, providing excellent potential for compensatory weight gain. Bred out of large-framed cows, they offer plenty of growth and performance potential for backgrounding or feeder operations. For further information, please get in touch. Please note, the vendor has 54 Shorthorn & Composite Steer calves in the same sale.
