Comment on Fat Score 1 Cattle

All cattle should travel fine to their final destination without any issues. Not poor.

Vendor Bred

No

Vendor has owned stock for Less than 2 months

Stock History

Purchased from Hunter Valley region back around Anzac Day period. These cattle have taken considerable time to adjust to new groupings and lush green grass, however they are now flying and will rocket forward for the next buyer.

Lifetime Traceable

Unknown

Breeding Comments

Angus x Angus Steers.

Grazing Conditions

Ryegrass & Grazing oats pasture mix, plus some access to ryegrass hay.

Returned same

Burr/Seed in Coat

No Burr or Seed of weeds declared noxious observed in the coats at assessment

HGP Status

The owner declares that the cattle have not been treated with HGP at any period of their lives

First Dose

Other Treatment

24/05/2026

Multimin Chrome Injection

Chemical Residue

None

Vendor Comments

The black steers were purchased from ongoing extensive dry period of weather and have now finally acclimatised to grazing cereal crops. Will continue to do well for the next buyer.

| Assessor Comments                     | These black Angus steers have endured a big change in diet and travelled long distance in the past 6 weeks. These cattle are very much going forward now and have transitioned to eating lush green crops and a cooler climate already. These steers should continue to march forward for the next purchaser, all the hard work has been done. No rebate.                                      |                         |       |                 |                |                |                |                |                |                |                         |                         |                         |                        |     |       |     |   |     |
