Assessor Comments	A quality line of August September drop angus steers. These Steers were yard weaned in mid February and were a pleasure to handle. Previous steers have performed well in major feedlots. Weaners are sired by Murdeduke bulls & are set up to explode if shown good feed. Note 24 steers had ring worm at assessment, with majority only having a small amount and 6 steers with a large amount on face. You will see 2 of the worse steers in the photos.
