	Heifers displayed good temperament at assessment. There was the odd heifer that became slightly agitated when put in the round yard and in close contact with the person drafting them, but only trying to escape the pressure. Overall they handled easily and were very well settled when standing in the yards post assessment.

Assessor Comments	On offer is an outstanding line of 62 NSM yearling heifers that are pure Bongongo blood. Heifers are in top condition for a spring joining and would be a great addition to any Angus breeding herd. The Harris family have always carefully selected sires, and the progeny they produce each year are reflective of that, with their steers always first out the gate in the early springtime to the feedlots and their heifers being phenotypically top shelf. Vendors herd is also EU accredited so this article would be suitable to be put into a feeding program given their weight and condition. Given the correct management moving forward these heifers will mature into a great run of cows. Cattle come highly recommended and for any further information please call assessor.
