	Cattle are well handled and displayed good temperament whilst put through the entire process of assessing. Calves were drafted off them, multiple mobs in and out of the yards in a short timeframe, plenty of bellowing and the yards were also quiet boggy. So with all this considered they did very well and with further low stress stock handling they will develop into nice quiet cows.

Assessor Comments	Presented is an excellent line of NSM Heifers with their first calf at foot. Heifers have calved at 2yrs of age, are presenting in forward store condition and display plenty of good maternal traits. Vendor has marked calves at assessment and all animal husbandry practices are up to date for these breeding units, perfectly set up to be joined later in the Spring. Vendor always operates on sires selected for growth, IMF and calving ease to which they buy in the top percentile of bulls in the Bongongo sales. These cattle are bred on a large scale which is scrutinized on performance and fertility each year, in turn these young breeders will be testament to that. For any further information please contact assessor but rest assured these heifers will grow out into a good moderate framed, working female packed with top end genetics that have been apart of Angus breeding for a very long time.
