Breeding Comments

Vendor being part of the Graham Family took on pure Bongongo cows as part of the family succession in the late 90's but the herds bloodlines stems back well further, to the earliest days of Bongongo Angus Breeding.

Assessor Comments	Presented is a good line of NSM Heifers with their first calf at foot. Heifers have calved at 2yrs of age, are presenting in forward store condition and display plenty of good maternal traits. Vendor has marked calves at assessment and all animal husbandry practices are up to date for these breeding units, perfectly set up to be joined later in the Spring. Vendor always operates on sires selected for growth, IMF and calving ease to which they buy in the top percentile of bulls in the Bongongo sales. These cattle are bred on a large scale which is scrutinized on performance and fertility each year. Given the opportunity these heifers will grow out into a good moderate framed, working female packed with top end genetics that have been apart of Angus breeding for a very long time. Vendor also has 4 head still in the paddock which are yet to calve, if they drop early next week purchaser has the option to buy them to add to this line.
