Assessor Comments	**EU** Steers Grass fed antibiotic free. Rarely do the "Mintarl" cattle come onto the open market. But a trying season has pushed these Steers onto A+. Standing on good bone and presenting in store condition these steers would normally be grown out to a heavy grass fed kill. This cross would also suit a domestic/supermarket feed or be back grounded to heavier weights for an export feed. They are full of Wakefield genetics from both the Charolais and Angus side. Vendor also has a line of heifers in the same sale. Odd blue eye noted not detrimental.
