	Steers were generally good to handle in the yards and through the crush. Five steers were mildly agitated while being weighed and three steers became highly agitated. They just would not come to a standstill in the crush and then exited quickly. All were nice and settled in the yards and move nicely for photos and videos.

Assessor Comments	A good to very good quality line of Angus and Angus x yearling steers. A mix of vendor bred and some steers that were purchased as calves on cows out of northern NSW. With medium to large frame they suit to background to heavy export feeder weights and then finish for a range of high quality markets. Assessed with a LWR of 227 - 407 kg with only two steers over 370 kg. The 407 kg steer was mouthed and was a solid milk tooth. The steers with blue paint in photos were just identified as the reserves required to fill the deck assessment. The steers are soft in the coat and are moving ahead on good quality winter herbage and pasture.
