Assessor Comments	The annual sale of Camilee August & September drop Angus heifers. All of these calves have been weighed full at assessment 295kg - 357kg and averaged 325kg. Being weaned since March and handled regularly these heifers are the ideal article for a spring trade to background, feedlot or even have the genetic profile to be quality breeders. The Camilee herd have been bred for structure, growth and performance. Camilee herd is based on Millah Murrah & Stoney Point cows joined to Nampara Sires. Bulls selected are high in 200 day & 400 day growth figures as well as structurally sound. Heifers that have been yard weaned, with an excellent temperament they were a pleasure to assess.
