	The Steers did rush a little when first put in the yards but to be fair we just ran them in, straight off crop and started assessing. They settled well after being let out of the crush, the videos were taken after the assessment so that will give you a good indication . A few played up in the crush but nothing unusual there, overall well handled cattle.			
Handled With	Bikes , Dogs , Horses , On foot			
Notable Traits	Traits 2 Head Old pink eye scar in one eye. 1 Head small patch of white on flank			
Assessor Comments	60 Top quality Landfall blood steers that have the length and conformation the Landfall bloodlines are renowned for. These steers have had no set backs and have been on Rye grass since weaning they will bounce away on grain or grass. Steers have been weaned since February when they were yard weaned and educated. They have had all the animal health treatments including 3 doses of 5in1. The tail has been taken out and the weight variance is age not quality related. A few have some rubbed patch's due to the change of season.
