Burr/Seed in Coat	No Burr or Seed of weeds declared noxious observed in the coats at assessment		
HGP Status	The owner declares that the cattle have not been treated with HGP at any period of their lives		
Health Treatments	Vaccinated	15/04/2026	7 in 1 Second Dose
Vendor Comments	A good run of store condition steers that will perform for the purchaser. We offer very quiet, well-handled steers that are bred in lighter country and will go forwards with good feed.

Notable Traits	<u>Traits</u>		
	35 Head Lice scarring		
Assessor Comments	119 head of extremely quiet vendor bred steers. These steers will excel quickly on good feed as all the hard work and preparation has already been done. With available nutrition these weaners will settle quickly and start growing. This line of steers has had M8U molasses initially at weaning and have continued on Weaner lick until assessment. I would expect the successful purchaser to see significant compensatory growth in these cattle. Please note there is some lice visible on a portion of these steers.
