Notable Traits	Traits 1 Head Black baldy 4 Head pink eye scarring not detrimental			
Assessor Comments	A quality line of Injemira blood EU eligible Hereford steers that have great bone, depth and muscle and exceptional weight for age. These are quiet cattle and were a pleasure to handle throughout the assessment process. These steers have been on grazing oats and are really starting to perform with the lead of the group doing over 2kg/day to average 1.3kg/day. High performing steers that will suit both the feeder market or would grow into very heavy bullocks given time and nutrition. # horned steers were dehorned at assessment, approximately 4 steers have old minor pink eye scarring not detrimental and one black baldy steer in the mob,(refer photos)
