	Some of the heifers in the mob were agitated and quick at times when pressured. Overall considering an older set of yards they still flowed well but care was needed when in pressure areas.		
Handled With	Aerial (Helicopters, gyro's and planes) , Dogs , Vehicles		
Assessor Comments	Offering 90 Angus cross and cross bred spayed heifers as a 3-deck line. These heifers averaged 350kg live at assessment after a large day in the yards of handling. The heifers were all spayed back in November and have done well since. These heifers have been on agistment at Willoughby over the last 9 months and the vendor is making room for new weaners. The majority of these heifers are close to feeder weight and given the right feed will be a quick turnover for the purchaser. Please see photos and videos to satisfy breed description.
