| Assessor Comments                     | On offer Ex Netallie Stn via Wilcannia NSW are 120 quality weaned Angus x Angus/cross steers weighing 351-465kg to average 377.4kg full at assessment. Bred in the renowned cattle regions around Tamworth and purchased in a couple of lines ex the store sales in April as spring drop calves, these calves have matured and grown into a nice line of steers. Steers have been on exceptional feed given the season in the far west and have gained significant weight since purchasing and would expect to gain weight quickly now as the cooler weather passes. These cattle have been well handled and were a pleasure to deal with during the assessment process and a primed to go into a feedlot scenario or onto more paddock feed to grow into heavy feeder cattle. **5 x steers showing slightly clouded eye on one side and 8 x steers with some small warts on either the face or neck, not deemed detrimental at assessment. **Please note vendor also has a line of 78 NSM heifers of a similar description in the same sale** |
