Assessor Comments	Buyers, very good quality EU ACCREDITED & PCAS ELIGIBLE heifers presenting in store condition. These historic JJ7 Partnership-bred cattle are being offered as Havelock moves through its upcoming purchase and transition to Campbell Pastoral Holdings, representing the first offering of Havelock cattle under the new ownership. The lead of these heifers have been retained for breeding purposes. As mentioned, these are just the heifers bred using Angus and Black Simmental bulls over the Poll Hereford cows. Most of these are thought to be at least F2's and F3's now as these bulls have been used for about 17 years. These heifers will suit a backgrounding operation to take up to domestic feedlot entry weights or retain for future breeding purposes. Be confident there will be no chance of calf in any of these as any of the heavier end over 200kgs back in July were vaccinated with Cyclase. There are a few with eye scarring and photos have been attached demonstrating the worst of these however, there doesn't appear to be any with any sight issues. They are extremely quiet and had a big sweat prior to being assessed so I would expect plenty of compensatory gains on arrival to their new destination. These will fit comfortably on a B-Double and there is also a 2-deck line of the Herefords from the same property available in the sale.
