Burr/Seed in Coat	No Burr or Seed of weeds declared noxious observed in the coats at assessment
HGP Status	The owner declares that the cattle have not been treated with HGP at any period of their lives
Chemical Residue	Clear - No known history.
Vendor Comments	A good line of annual turnoff weaner steers

Temperament

Yards	Crush	Paddock
Quiet: 121 head Slightly Stirry: 22 head	Quiet: 98 head Slightly Stirry: 39 head Stirry: 6 head	Temperament not assessed in Paddock

Weaner steers moved fairly quietly through yards provided it was done at a slow pace. Under pressure they behaved like a typical weaners with a tendency to move quickly from a few ring leaders, especially if they became isolated from the main mob. Handled reasonably well through the force and race but some did resent being up close and personal on the scales in the crush. These are expected to settle further whilst being fed in the yards.

Handled With	Aerial (Helicopters, gyro's and planes) , Bikes , Horses
Assessor Comments	Buyers, presented is a great opportunity to purchase a light 4 deck line of freshly weaned mainly flatback crossbred steers. Most of the steers appear to be flatback types however there are some steers (maybe 5-10 head) with some Brangus content so consequently a slight crest and longer ear. These steers would be ideal to put onto a fresh paddock or crop with all of their conformation around bone, depth and structure presented. Given the opportunity these animals would grow into the ideal item for entry weight to the feedlot, backgrounder or to carry through to bullocks. As mentioned the steers were recently yard weaned and fed wheaten hay. Vendor also has a run of 134 weaner heifers in the same sale.
Assessor	**William McArthur (Level 3 Accredited)** Phone: 0499 885 245
Delivery Period	20/09/2026 to 22/09/2026 (3 days)
