	Great test for cattle being a horrible windy gusty morning. Very easy to work with in race & crush. After assessing calves they were showing weaner attributes trying to get back to mum on the other side of fence other than that cattle were easy to handle. 1 stirry heifer that was isolated. The Gall family cow herd have always emphasised on quiet temperament with some calves being docile like their mothers. Suitable for all buyers.		
Notable Traits	Traits 2 Head 2 minor blue eyes 3 Head Black Baldie 3 Head odd Naval		
Assessor Comments	Very high quality EU weaner heifers. The Gall family have been breeding out of a thumping large frame self replacing Palgrove foundation cow herd for over 20 years. 75% Black Angus heifers sired by Bondfield Angus Bulls. 25% representing beautiful hybrid vigour throwing back to the creamy type. These heifers would do justice to any breeding herd being from a highly fertile cow herd averaging over 750kg. These Deep bone heifers are apart of Greenhams Never Ever program being suitable for the grass fed fattening program as well. Impressive weight for age soft weaners with no heifers retained.
