Assessor Comments	An exceptional 3 deck line of vendor bred ORGANIC, USDA, NOP and GAP certified pregnancy tested empty heifers that have had all the hard work done. Heifers from Ravensbourne are considered to be one of the premier herds of cattle in the Blackall district and are not often released onto the market. These would be an asset to any potential successful purchaser to mate to the bulls of choice straight away with a view of classing them at a later date for many years of breeding purposes. The herd is heavily classed annually and they are genetically very sound cattle. The bar is set very high at Ravensbourne and these females are surplus to the vendors needs but still represent a golden opportunity for buyers to step into the Santa industry.
