Assessor Comments

On offer Ex Netallie Stn via Willcannia NSW are 72 quality weaned Angus x Angus/cross steers weighing 307-518g to average 381kg full at assessment. Bred in the renowned cattle regions around Tamworth and purchased in multiple lines ex the store sales in April as spring drop calves, these calves have matured and grown into a nice line of steers. Steers have been on exceptional feed given the season in the far west and have gained significant weight since purchasing and would expect to gain weight quickly now as the cooler weather passes. These cattle have been well handled and were a pleasure to deal with during the assessment process and a primed to go into a feedlot scenario or onto more paddock feed to grow into heavy feeder cattle. **9 x steers showing slight scarred eye on one side & treated with terramycin at assessment. 7 x steers with some small warts on either the face or neck, not deemed detrimental at assessment and 2 x steers that appear to be late cut. **Please note vendor has 15 mixed British bred heifers available to purchase av 370kg or to use as truck fillers towards a market if desired. Details available.
