	1 Head	Active pinkeye		
	2 Head	Old Scarring		
	4 Head	Warts on head		
	1 Head	White on brisket		
	1 Head	White under flank		
Assessor Comments	Buyers here you are presented with a rare opportunity to secure a line of pure Furracabad Angus blood heifers, offering direct access to genetics from the heart of the Furracabad breeding herd. Females carrying these genetics are rarely offered to the open market, making this an excellent opportunity for breeders looking to introduce proven Furracabad bloodlines into their own herd. The Furracabad Angus breeding program has maintained a strong commercial focus, with an emphasis on producing functional, fertile and efficient cattle that perform in real-world conditions. Particular importance is placed on maternal performance, fertility, doing ability and producing progeny capable of performing through both grass-fed and grain-fed production systems. These heifers provide buyers with the opportunity to establish or strengthen a breeding program around genetics that have been selected with commercial profitability and performance in mind. An opportunity to secure genuine Furracabad females of this quality and breeding is rarely presented to the market. Please note one heifer was identified at assessment with active pinkeye and was treated at the time of assessment. Please see photos for further satisfaction.			
Assessor	Jake Rosten (Level 2 Accredited) Phone: 0429 001 783			
Delivery Period	05/10/2026 to 07/10/2026 (3 days)
