Handled With	Bikes , On foot , Vehicles
Assessor Comments	Ideal weight heifers to take on for the spring. These heifers have not had an abundance of feed right through, but they are starting to lose the winter coat and will perform well with the right nutrition. This is the lead of heifers with a small tail removed, with majority of heifers Vendor Bred, with only 2 being purchased as cows and calves in November. There is a fair bit of compensatory weight to be gained from these cattle.
