HGP Status	The owner declares that the cattle have not been treated with HGP at any period of their lives		
Vendor Comments	Charolais sired steers that were bred at Gwabegar property, had a dry season their entire life then trucked to Tottenham property to wean and freshen to sell. Selling early due to diminishing water supplies.		
Temperament	Yards	Crush	Paddock
	Quiet: 5 head Slightly Stirry: 10 head Stirry: 12 head	Quiet: 2 head Slightly Stirry: 5 head Stirry: 18 head Aggressive: 2 head	Temperament not assessed in Paddock
	Drafted from a large mob the steers were easy to mob up and walk in with the larger mob. These weaners were not yard weaned and handled as they usually would be and it shows in their handling. In yards they flow through well but need to be steadied as they do through quickly. In race/ weigh box they did become agitated in weigh box. When back in mob were more settled again. However more handling of the mob is required as a whole.		
Handled With	Bikes , Dogs , Vehicles		
Notable Traits	Traits 1 Head Freshly weeping eye from dust in yards or bump on eye etc 3 Head Late marked, some looser sheath, slightly thicker head		
Assessor Comments	An even, quality line of Charolais cross steers. Bred at "Cullenya" Gwabegar and mostly run on cows in timbered country with minimal handling and with a dry season under them since birth. Since being weaned down to Tottenham property the steers have performed very well in the time on hand for weight gain and growth. For sale earlier than trading program predicted due to shortening water supplies. A genuine article that are really on the move forward with lots of frame and compensatory gain. Usually these steers are weaned at heavy weights and perform very well in backgrounding or feedlot operations.
