Assessor Comments	A good line of Angus steers 303-399kg at assessment, grass-fed, antibiotic-free, 2025-drop steers. The steers have been grazing irrigated oats and rye, with access to lucern hay and a dry lick. The vendor places a strong emphasis on genetics, temperament and performance, with these steers presenting in forward store condition and offering excellent weight gain potential. The cattle are quiet, well handled and were yard weaned in February 2026. They come from a program with a proven history of strong feedlot performance.
