	These weaners are easy to handle. They are responsive to pressure and settle once the pressure is released. When in a larger mob they were more unsettled but once they were separated they were more relaxed.			
Handled With	Bikes , Dogs			
Notable Traits	Traits 5 Head Eye blemish - not detrimental to performance. 5 Head Light wort around face/neck. 1 head with medium warts on neck. 4 Head Minor ring worm.			
Assessor Comments	Offering a b-double load of Angus and Angus cross heifers weighing +170kg at assessment after a 17 hour curfew. These heifers are acclimatised with all treatments up to date and are noticeably stacking the weight on. They have been rotationally grazing on cereal crops and improved ryegrass and clover based pastures that have ample food on offer due to spring. They have recently had their treatments including an MH+IBR and are recording positive daily weight gains and starting to shine in the coat and lay fat cover. With excess feed this line presents as the ideal low value trade article to background for the strong feeder or kill markets with all of the preparation and expense behind them. Quality Angus cross heifers that are settled in their group and will remain as one until delivery.
