Very quiet in the yard and paddock.

Handled With: Bikes

Assessor Comments	A good line of Angus/Brangus x weaner steers. 6 - 12 months, 150 to 250 kgs to average 198 kgs after a 17 hour dry curfew. These steers are very quiet to handle both in the yards and paddock. A few steers were bred from composite cows that could have some Limo or Hereford genetics. Up until the past week, the season at Heywood has been very dry. Some of these steers were weaned early. They are all in store condition, the tail including anything smaller and or backward store conditioned steers were put in the separate lighter mixed sex line. One steer with a light smokey eye, not a problem. One steer shiny in the coat showing more brahman content. They are all clean around the head and although in store condition they should grow out to feeder weights on good feed over time. (see two separate videos). I have no hesitation recommending these weaners steers to someone wanting steers to put away. NB: See two other lots of vendor bred weaners in this sale.
