Yards	Crush	Paddock
Quiet: 14 head Slightly Stirry: 1 head	Quiet: 13 head Slightly Stirry: 2 head	Temperament not assessed in Paddock

The weaners worked well in the yards and through the crush. The odd weaner became unsettled while in the crush but settled once released. Since arriving at the home property, the weaners have been well handled and accustomed to regular human contact. They have been running in a small paddock, feeding out on the road amongst vehicle traffic, worked with dogs and being checked daily.

Handled With

Bikes , Dogs , Horses , Vehicles

Notable Traits

	Traits
1 Head	Marking ring put on 1 male calf
1 Head	Rubbing
2 Head	Small White mark on underbelly/scrotal area

Assessor Comments

Vendor bred Angus weaned steers, that were bred on lighter Rocky River country (40km east of Tenterfield, weaned early due to drought conditions and trucked to Vendor's Tenterfield property for weaning and handling. Steers weighed from 112kg to 171kg to average 135.7kg after a huge curfew. Cattle are generally worked with horses and dogs and were good to handle during assessment. Please note these weaners have been running in a 20 acre paddock and will jump out of their skin on improved nutrition. Brother and sister lots in same sale (131 in total).
