Temperament

Yards	Crush	Paddock
Quiet: 9 head	Quiet: 7 head Slightly Stirry: 2 head	Temperament not assessed in Paddock

Like most Northern Cattle , some may become agitated if isolated or overly pressured but quickly calm when returned to their mates.

Handled With	Bikes , On foot
Assessor Comments	A lightweight group of mixed sex weaners responding well to feed. These are predominantly "flat back" types with only a small number of Brahmans included. A lot of potential for these young cattle to thrive given the opportunity, they are taught to eat out of a bunk and should readily accept further controlled or supplementary feeding. They are healthy and ready for the next stage of production. They were quiet to handle and while they still have a reasonably wide flight zone, there is zero aggression and were not overly stressed with me in the yard for photos and video. Suitable for both large scale operators as well as smaller holdings. A reminder that the Vendor will deliver local if you have enough room to accommodate a body truck or link up with 3 other lots from this vendor in this sale and take advantage of the longer freight offered.
