Very well educated and handled - the steers flow without pressure, easily block and happy to stand quietly. The odd steer fussed when confined for weighing however settle quickly when released. The 8 #6 steers have been yard weaned for 11 days and will received additional handling and tailing until delivery.

Handled With	Aerial (Helicopters, gyro's and planes) , Bikes , On foot

Notable Traits

	Traits
1 Head	Light fly rub

Assessor Comments	Exceptional quality Santa, Santa x, Angus & Angus cross and Char x steers. HGP free. Very well grown, heavy bone and muscle. Quiet and easy doing placid cattle. Not able to be mouthed at assessment however given the declared age we expect the majority to be milk and the odd 2 tooth. Should any present with 4 teeth at induction a 10 cent discount will apply to those individual steers with verification. 8 recently weaned #6 steers included in this lot.
