5 Head	Lice rub
2 Head	Warts head

Assessor Comments These steers are all frame with a large amount of compensatory weight gain. They would suit taken on to heavy feeder weights or grown out for grass export programme. The 1 Angus x steer has scurrs, see photo. The steers mouthed were the 8 heavier steers, whilst all milk teeth steers they were showing wear which can attributed to the grazing conditions which has been short stubble until recent rain event. None were showing any sign of breaking their adult teeth. Steers were purchased to grow out to heavy feeders steers but seasonal conditions have not allowed this, selling to allow pasture recovery.
