**Assessor Comments** 138 Good Quality, vendor bred Brahman and Brahman Cross heifers that were weighed from 200-310kg to average 249kg at assessment, after 4 hours off feed and water. These heifers were drafted into a high grade, grey, red and honey line on visual types. They present in store condition with good frame to grow out as future breeders or background for the domestic or export feeder markets. Heifers are unjoined and were good to handle through the yards after being mustered the day before in hot conditions. Lands End is located north of the tick line however the vendor guarantees they scratch clean at delivery for QLD buyers or will guarantee they clear the Dip at Julia Creek for interstate buyers. Please note the two delivery dates the cattle remain on hand in the yards.
