Drenched	01/10/2026	Mectec pour-on LV.	
Vaccinated	25/06/2026	7 in 1 (branding)	First Dose
Vaccinated	01/10/2026	7 in 1 (weaning)	Second Dose

Chemical Residue

Clear - No known history.

Temperament

Yards	Crush	Paddock
Quiet: 36 head Slightly Stirry: 6 head Stirry: 4 head	Quiet: 40 head Slightly Stirry: 6 head	Temperament not assessed in Paddock

Steers are reasonably quick in the bigger yards and need to be steadied through gateways. They were good to draft in and behaved well in the race and on the weigh platform in the crush. There are no steers considered aggressive however. Buy advised to allow steers time to settle on arrival before they are shown the "bush gate".

Handled With

Bikes

Notable Traits

	Traits
5 Head	Needle lump (neck)

Assessor Comments

Buyers here are some predominantly fair quality Droughtmaster and Droughtmaster cross EU ACCREDITED weaned steers. These steers present in very plain condition as it has been very dry here prior to the recent rainfall that has fallen over the past few weeks. As a result, these have weighed in lighter than they look and as such I would anticipate some handsome compensatory gains in the immediate future. Some of these would be out of 1st calf heifers and they are usually the females that struggle a bit whilst trying to rear a calf in dry conditions. You will notice in the photos and video some of these are off to a rough start in life however with a bit of animal health input, maybe some AD&E and vitamin B12 it could give them a lift and allow them every opportunity to reach their full potential. There was a lighter tail removed from this line to make this a comfortable single deck lot. These will suit restockers to put away for the long term and allow them to grow out for domestic feedlot entry. Buyers should note there is also a 2-deck lot of heifers that can be used to fill up a B-Double to reduce freight costs.
