Assessor Comments	26 Landfall, Reiland blood Angus steers, averaging 303.3kg at assessment. These steers had been off feed for 3 hours prior to weighing but had been off water for 14 hours. Steers were quiet and easily handled, typically a few getting excited on scales but all walked off and calmed once back with mob. Please note 1 steer seen with small scurs and 1 seen with small wart. Steers should go on and meet most markets specs if given the opportunity.
