These heifers went through an extensive weaning program that is a credit to the vendor. They were a pleasure to handle through all areas of the yards and assess. An odd heifer did get slightly agitated in the crush but the was predominantly due to the injectable being given to them, they settled quickly once back the mob.

3 Head	Fly bite

Assessor Comments	Buyers please see the opportunity to purchase a good quality line of weaned backgrounder heifers with all the hard work done. These heifer are responding well to recent rain and I would expect compensator gains for the successful purchaser. These heifers are bred on light forest country at Jackson out of a large frame cow herd and all sired by a Bonox bull. These heifers would suit backgrounding through to feeders or slaughter weights or alternatively have enough quality and breeding to make excellent breeders.
