Steers were a pleasure to handle through the yards, any steers noted as slightly stirry only became unsettled when pressure was applied and quickly settled once pressure was released.

Assessor Comments	Buyers, here is an opportunity to secure a 3 deck line of store condition, light weight backgrounder steers that are weaned and very well handled. These steers come from a herd based largely on quality Glenlands Droughtmasters genetics and have a strong reputation for growth performance on both grass and grain. The vendor has made a big effort to have these steers well educated. The calf sap has been weaned out of these steers and their going ahead well gaining .4kg/day since weaning. They are in strong store condition and are ready to power ahead once given the opportunity on good feed. These steers would be ideally suited to background into the trade or heavy feeder markets. The vendor has pre-treated this lot for tick clearing with a vetmec injectable, however does not guarantee them clean. Note the vendor has a 3 deck line of heifers in the same sale.
