Assessor Comments	A good line of vendor bred Angus & Charalois/Brangus x yearling heifers. 18 - 22 months, weighed 335 kgs to 450 kgs to average 378 kgs, 2 hrs off feed. There has not been bulls anywhere near these heifers, but all WERE ALL SCANNED UNDETECTABLE BY CONTRACTOR BEN SCHOTTELIUS of Paroo Contracting after the assessment. These fresh and heathy heifers are very quiet to handle both in the yards and paddock. A few heifers were bred from composite cows that could have some Hereford genetics. Up until the past month, the season at Heywood has been very dry. Good fresh summer grasses have put a good shine on their coats. They are all in fresh forward store condition apart from 4 head that although good in the coat are in lighter store condition. (see videos). All milk & two tooths, Heifers above 400 kgs were mouthed, mostly with 2 teeth. One 4 tooth removed from the mob. An obvious tail plus anything lighter or heavier were also removed. The heifers are all clean around the head. I have no hesitation recommending these yearling heifers to someone wanting heifers to fatten. NB: New NLIS tags have yet to turn up but should be on farm by delivery date.
