Notable Traits

	Traits
1 Head	Weeping eye treated at assessment. Could be more come delivery given weaning conditions.

Assessor Comments: Offering the complete drop of the RJ Flint autumn born weaners. Well grown for age being heavy boned and presenting with a dark red coat these weaners are an accurate representation of the quality of the genetics invested into the herd. Genetically they are out of large framed Wirruna and Yavenvale Poll Hereford blood sires and dams. They were yard weaned at assessment and will remain on quality hay and silage being fed ad lib until delivery. Due to the season drying out, 1 head was treated with a weepy eye at assessment and it would be possible for some weaners to have a weepy eye by delivery. Vendor will monitor and treat eyes should they be an issue before delivery. These weaners have performed for the vendor and buyers in the past. Quality poll Hereford weaners that will continue to grow into bullocks if required on quality feed.
