Assessor Comments

Very well bred line of Angus steers showing good frame for their age. Steers were all weighed 340kg+ at assessment with any off types removed from the group post weigh. Steers which were marked late as calves but are growing into their body well with the vast majority really starting to soften up in the coat. Currently running on a grazing crop and performing well as a group. Steers have really come a long way in the last month and will continue to tidy up as they mature. i encourage all buyers to please call for more detailed information pre auction. Vendor also offering another line of composite steers of the same weight category. Please view video to appreciate the upside these cattle exhibit.
