Assessor Comments	Wonderful line of black steers with a portion showing B muscle shape. An outstanding small line of black steers that would be an ideal acquisition for the discerning buyer. Please note: 3 have been marked in past month and 1 is still to drop their dried testes sack. These 3 still show some bull muscling, but it will disappear over time. Temperament & Breeding out shine these minor characteristics above. Been running on second farm over in the hills on lush green pastures for past two months, until late October. They will transition back to grass very well for the next buyer.
