Assessor Comments

An outstanding line of 223 composite x suckers. These lambs consist of 90% Charollais and 10% Hampshire sires over Lambpro maternal primeline ewes. They are the lead draft of the drop from a tight 4 week lambing in April. All lambs were individually weighed from 32-45kg.While on ewes, the suckers were imprinted onto barley. Lambs have been weaned and have received up to date health treatments. Note a total of 446 lambs in run sold over two lots of 223 head.
