Assessor Comments	Tops of the drop vendor bred poll Dorset and Southdown cross merino sucker lambs. 100% weighed 30kg plus at av 38kg at delivery. They are sired by Merringreen Poll Dorsets with approx 15% Southdown sired. The dams are vendor bred large framed, plain bodied stretchy Greenfields blood - SA based genetics that are annually joined to terminal sires. These lambs were bred on the vendors property at Hay and moved back to Conargo after weaning and have been running on a quality vetch paddock. They have been drenched and vaccinated and gaining on average 400 grams/hd/day since their induction drench. They are still holding tight in their skin and would be suitable for a kill without shearing on continued quality feed. Over the past few years these lambs have been turned off on grass and grain to kill weights. They are being sold this year due to slow start to the season at Hay and plans to spray out the vetch for the summer cropping program. Quality xb lambs with a track record of performance and with current weights for age there is no reason to suggest this year will be any different.
