Other Health Information	Raised without Antibiotics

Wrinkle Score

Plain	6%
Light	44%
Medium	42%
Heavy	8%

Assessor Comments	316 April/May 2026 drop East Bungaree blood merino wether lambs. Presented here is the lead draft of 616 wether lambs, in fresh - forward store condition, shorn and ready to go onto feed. Vendor has been buying EB rams since 1938, pouring great genetics into the progeny of their breeding mob year after year. The extraordinary performance of the breeding behind these lambs proves with their older 2023 drop brothers dressing out this year straight out of the paddock with no supplemental feed at 37.8kg carcass weight, and their 2024 drop brothers dressing out at 35.7kg carcass weight at only two years of age. Not only will they grow and yield, but these lambs will grow a beautiful heavy cutting fleece of medium wool. Lambs are M&TS, August shorn, back lined at shearing, and 45KG at assessment. Please note - approx 50% of the lambs show medium body wrinkle, and light clover burr found at assessment.
