Assessor Comments	280 April/May 2026 drop East Bungaree blood merino future breeder ewe lambs. Lambs are in fresh - forward store condition, shorn and ready to go onto feed and grow out into large - framed, deep bodied mature ewes. Vendor has been buying EB rams since 1938, pouring great genetics into the progeny of their breeding mob year after year. The extraordinary performance of the breeding behind these lambs proves with their older 2023 drop brothers dressing out this year straight out of the paddock with no supplemental feed at 37.8kg carcass weight, and their 2024 drop brothers dressing out at 35.7kg carcass weight at only two years of age. With not only fertility behind them with the mothers having over 100% lambs, these lambs will also grow a beautiful heavy cutting fleece of medium wool. Lambs are M&TS, August shorn, back lined at shearing, and 35.7KG at assessment. Please note - approx 25% of the lambs show medium body wrinkle, and light clover burr found at assessment.
