	Traits
30 Head	slight scur

Assessor Comments: Sleigh Farming offering annual draft of Wether lambs off "Bayunga" Ruffy. Have been on Toland Rams for 30 plus years, selecting top end Rams for positive carcass attributes as well as very positive wool traits. Typical of invested genetics and appropriate management, these wether lambs present as a quality line. The kind winter conditions and clean feed is reflective in lambs, they are loose skinned and a picture of health. Skins are clean and presenting well nourished, with a good start in the clip. Black dust appearance is due to grazing on fire grounds, but these guys have seen nothing but green grass and good times. 100% weighed. Note, Small percentage with water stain over shoulders (In that percentage approx 30% have light dermo off skin only in that shoulder location) Noted doing sheep and are regularly sort after by repeat buyers. Weaned on the 10/09. Market Crutched. Their sisters last year went 17.1 mic and 70% yield. mature Clip av 18.6 mic.
