| Joining Details | Not Station Mated | | | |
| Any Access To Rams or Stags? | To vendor's best knowledge, this lot has had no access to rams or stags. | | | |
| Assessor Comments | 275 composite ewe lambs, all weighed 38kg - 56kg full to average 43kg. They were dropped in June & July, drenched and vaccinated on the 11/10 and crutched on the 27/10. They were weaned at assessment so will have been off mum for 7 to 10 days at delivery. Majority of these lambs were born as twins. A neighbour has recently started trading lambs so these ewe lambs have been drenched with Flexolt for precautionary measures only. For the past 17 years the vendor has only bred from lambs that were born as a twin and for the past 5 years only ewe lambs that were born as a twin out of a ewe lamb has been kept, which has created an unbelievably fertile flock. In 2025 the ewe lambs scanned at 175% and for the last 5 years the flock has marked 150-155% to ewes joined each year. The ewes are run hard under commercial conditions and all progeny are killed off mum or finished on summer crops and sold to the domestic trade. The lambs are a bit lighter this year due to the lack of clover however given extra protein they will jump away. One of the most impressive flocks I've witnessed. | | | |
