| Vendor Comments | Annual sale of composite wether lambs. |
| Assessor Comments | A well-bred line of 820 Composite wether lambs, August/September 2026 drop, Chrome bloodlines, averaging 39.8kg at assessment. Weaned on 11 November 2026, when they were drenched and vaccinated. Lambs were imprint fed grain on their mothers prior to weaning, providing a useful grounding for buyers looking to introduce supplementary feeding. Plenty of breeding behind these young lambs, offering buyers an opportunity to secure a sizeable line at an ideal weight to take through to domestic or export market requirements. |
