| Assessor Comments                     | Great line of Merino ewes that are scanned in lamb at 142%, to Hillview dohne rams. Vendor brought them in to graze stubbles at harvest 25 and is only selling them as they are not the blood line he runs.                                                                                                                                                                                    |
