Assessor Comments	They are a neat line of ewes that are predominantly Rideway Advance blood showing solid frame and structure and have done well on grazing wheat and present in good forward condition. They have been running with Thurlstone White Sufflokk rams at 3% since 16th July. They were purchased SIL and lambed down and have proven to be good mothers and had 125% of lambs weaned 5 weeks ago. There is approximately 25% that are mulesed and 75% unmulesed. There is 20% that would benefit from a crutch due the freshness of the feed.
