Assessor Comments	A line of 400 NSM ewes that were purchased on 18th May from the Wilson Partnership at Clements gap. They are Collinsville and Glenowie bloodlines, and will present as forward to fat condition, being good medium to large frame. Ideal ewes for xb prime lamb production. At the time of purchase it was disclosed that they had exposure to ram lambs and stags for about a week. All the ewes will be wet and dried at time of delivery, and anything doubtful will be pulled out. There has been no further exposure to rams since 20th May. These ewes are being sold because they have done their time in the vineyard, and time to move on. They are May/June 2023 drops, weighing in at 61 kg, and on a rising plane of nutrition. They are a complete age drop with the tail removed. The previous owner, who bred the ewes, owned a number of properties, with the property names showing on the ear tags, as per the photos.
