Assessor Comments	A great opportunity to purchase some proven breeders that are Outback MPM blood. Rising 2 year old all ewes were scanned in lamb and had 125% of marked lambs. These ewes have only had those lambs weaned off 3 weeks ago and are recovering ready for a later spring joining. These ewes have been shorn every 6 months and are ready for another shearing with the wool length approx 53mm. Ewes have been crutched a while ago and have gone a bit daggy since. Will receive a ewe guard booster vaccination today monday 7.9.26.
